DETROIT, Mi. (January 15, 2019) – AmericanMuscle’s (AM) Justin Dugan visited the COBO Center in Detroit, Michigan for the 2019 North American International Auto Show and the official reveal of the 2020 Shelby GT500. After a brief press conference, Ford Motor Company revealed the new Shelby in typical entertaining fashion using a video game/virtual reality presentation topped with craning the pre-production GT500 onto the stage for its official introduction.

The all-new Shelby GT500 is the most powerful, street-legal Ford ever built featuring a hand-built 5.2L aluminum V8 equipped with Eaton’s 2.6L supercharger and a cross plane crankshaft. The 2020 GT500 delivers more than 700HP through a 7-speed dual-clutch transmission capable of changing gears in less than 100 milliseconds. With the ability to click off a 0-60MPH times in the mid to low 3-second range and sub 11-second quarter mile passes, the new GT500 is destined to become a Hellcat Killer.

In this episode of AM’s Mustang News, Justin dives deep into the new model discussing everything from colors, packages, aero, [cooling](#), [wheels](#), [brakes](#), [tires](#), [suspension](#), [exhaust](#) + more! Also featured in this episode is some one-on-one time with Chief Engineer Carl Widmann from Ford Performance and Ford’s Chief GT500 Designer, Melvin Betancourt to discuss some of the finer design elements and story behind the all-new 2020 Shelby GT500.
